

**Position:**

Research Scientist

**Location:**

Apex Bait Technologies, Inc., Santa Clara, CA

**Description:**

Apex Bait Technologies, Inc. (<http://www.apexbait.com>) is a small, research-based product development company focusing exclusively on insect bait development. It is established as a premium bait technology developer with technologies licensed to some of the largest agrochemical corporations in the world. The company is currently seeking a Research Scientist to focus on developing new technologies for control of bed bugs. The successful candidate will be expected to work independently in conducting assays, collecting and analyzing data, and maintaining records. As the position will involve collaboration with academic partners at the University of South Dakota (<http://pietrlab.weebly.com>), the successful candidate will also participate in preparing research manuscripts and presentations. A competitive salary, medical/dental insurance and a performance-based year-end bonus are available.

**Qualifications:**

A PhD in entomology, zoology or a related biology field. Research experience with insects, particularly bed bugs, is preferred. Expertise in insect behavior, chemical ecology, organic chemistry, electrical engineering, food science, or microbiology is also desirable. Candidates with an MS degree will also be considered.

**How to Apply:**

To apply, please submit a current CV and cover letter outlining your interest and qualifications for the position directly to Dr. Dangsheng Liang ([dliang@apexbait.com](mailto:dliang@apexbait.com)).
