

## Scientist

New York

Firmenich SA

---

**Website:** <https://jobs.firmenich.com/job/NYC-Firriver-Scientist-New-York%2C-NY-NY/542078301/>

---

### Qualifications

---

- Degree in olfactory biology or related chemosensory fields, PhD strongly preferred
  - 2+ years of post-doctoral academic or industry research experience.
  - Proficiency in biochemical, molecular, and/or cellular biology techniques relevant to assay development and implementation.
  - Proficiency in receptor/ion-channel pharmacology and related ligand chemistry.
- 

### Description

---

Understanding the chemical perception is a fundamental work to comprehend the chemical ecology of arthropods. The candidate will:

- Lead projects to address fundamental scientific questions in the general area of olfaction with specifics to be discussed during the interview.
- Foster a problem-solving mindset and devise innovative approaches to problems at hand.
- Communicate results cross teams and identify potential collaborative synergies.
- Maintain up-to-date awareness of relevant knowledge and technologies.
- Continually identify opportunities to improve current procedures, protocols, and systems.
- Participate in data interpretation and information sharing with the wider research team.
- Present results at team and department meetings, and at external scientific conferences.
- Write manuscripts of scientific results and submit for publication in top-rated, peer-reviewed journals, patent applications, and/or internal company reports.
