## **Postdoctoral fellow (1 + 1 year) in insect electrophysiology IOCB – Prague – Czech Republic**

The research group Chemistry of Social Insects offers a PostDoc position in electrophysiology of termites, with emphasis on the olfactory detection of queen pheromones and queen recognition chemical cues. We are looking for a candidate having active experience with standard electrophysiological techniques (EAG, GC-EAD, SSR), supported with publication records.

Learn more about our institute here: <https://www.uochb.cz/en>,  
and about our research group here: <https://hanus.group.uochb.cz/en>

The position is expected to be funded via IOCB Postdoc Fellowship program, offering a competitive salary, including full health insurance coverage. The candidates are selected based on their research profile and a project elaborated by the candidate in co-operation with the host research group head. Submission deadline 1 October 2021, starting date 1 January 2022.
