

Open postdoctoral position in Chemical Ecology at Cornell University, Ithaca, NY. PhD in the biological sciences or chemistry required and expertise in mass spectrometry-based metabolomics and natural products chemistry is essential. We are looking for an already accomplished scholar with interest in bridging chemistry, organismal biology, and field ecology. Please send letter of interest and CV to Anurag Agrawal at agrawal@cornell.edu. Current research projects and publications are available at www.herbivory.com. Start date is flexible but letters will be reviewed beginning 1 May 2023.
