

Postdoctoral Researcher Position

Texas A&M University, College Station, Texas, USA

Application Deadline: Review of applications will begin immediately and continue until the position is filled.

Start date: Immediately

Website: www.helmslab.com

Description

The Helms Lab is seeking applicants for a postdoctoral researcher position to work in the areas of sustainable agriculture and chemical ecology in the Department of Entomology at Texas A&M University. The individual in this position will work on a USDA-funded collaborative project with the Tomberlin Lab (Texas A&M) and Jordan Lab (Mississippi State), examining the ecological, chemical, and microbial components of black soldier fly waste digestion. The successful candidate will also lead/participate in on-going research projects in chemical ecology and plant-insect interactions in the Helms Lab. The individual will have an opportunity to initiate new innovative research projects in the identified focus areas, participate in grant proposal development, and engage in student research mentoring. This position is for one year with the opportunity to renew annually, depending on satisfactory performance and funding.

Qualifications

Applicants should have experience with chemical and/or molecular ecology techniques, strong written and oral communication skills, and a Ph.D. or equivalent doctorate in an appropriate field (e.g., Entomology, Ecology, etc.). The ideal candidate will also have a strong background in statistics, teaching and mentoring experience, and a demonstrated ability to conduct research with a team.

Application Materials

Interested applicants should email a cover letter, their CV, and the names and contact information for 3 references to amhelms@tamu.edu

Submit applications and further questions to:
